Math 568M
Winter 2012

Exam 2 Review

Instructions for Exam:

- You may not use any books or notes during the exam.
- Calculators are permitted EXCEPT those calculators that have symbolic algebra or calculus capabilities. In particular, the following calculators and their upgrades are not permitted: TI-89, TI-92, and HP-49. In addition, neither PDAs, laptops nor cell phones are permitted.
- Make sure to read each question on the exam carefully.
- Please **write clearly** and make sure to **justify your answers**. Correct answers with no supporting work may receive no credit.

Suggested Review Questions

The following questions are suggested review questions from the textbook. If you are able to do these problems then you should be prepared for the exam. Please note that you are still responsible for the material contained in any question that has been assigned, whether collected or not.
