

Math 150, Section 3.2

Lec: Naushad Pasha Puliyambalath

October 12, 2009

Purpose of this section

In this section we learn long division which is a procedure to divide one polynomial with another polynomial. This section in the book also talks about Synthetic division, Remainder Theorem and Factor Theorem which we won't be covering in this class, so you don't have to study them.

Long Division

Nothing much can be said here in words. Go through the examples given in the book and try problems 3, 5, 6, 8, 9, 12, 20.
